

**African Coal Offers Europe a Corridor Outside the Gulf's Reach — [Africa Energy Week](#)
30 Mar 2026**

European energy security is facing yet another test. After two major supply shocks in four years – first Russian pipeline gas and now disrupted LNG flows from the Gulf – utilities are being forced to rethink not just suppliers, but supply routes. As geopolitical risk concentrates around key gas infrastructure and shipping chokepoints,

**Africa Energy Announces 2025 Year End Results -
[Africa Energy](#)
25 March 2026**

Nigeria has officially handed over the African Energy Bank (AEB) headquarters, a flagship institution to mobilise capital for the continent's energy priorities and reinforce energy value chains.

The News Agency of Nigeria (NAN) reports that the handover took place on Tuesday on the sidelines of the ongoing Nigeria International Energy Summit (NIES 2026) in Abuja.

**Coal Could Provide African Small to Medium-sized Enterprises (SMEs) Much-Needed Fiscal Relief Amid Escalating Fuel Prices – [Newswings.com](#)
27 March 2026**

Africa continues to face significant implications from the ongoing Gulf war, with Brent prices fluctuating from \$81 per barrel on March 3 to \$112 on March 12 and back down to \$98 on March 25. But rising crude prices pose challenges beyond imports, with African economies that rely heavily on diesel-fired power generation now facing both unreliable supplies and higher fuel costs.

Chevron's local engagement strategy in Africa sets the standard for International Oil Companies (IOC) operating on the continent
[Storage Terminals Magazine](#)
18 March 2026

In Nigeria, Chevron has similarly prioritised local supply chains as a core component of its local engagement strategy. Over the past decade, the company has spent an estimated \$1 billion annually on Nigerian suppliers and service providers, directing more than \$10 billion to domestic contractors and businesses.

Africa & the Iran War: What the Oil Price Shock and Shipping Disruptions Mean for Economies
- [Doowe.ng](#)
17 March 2026

With Brent prices swinging from \$119 to \$86 in a matter of days, the Strait of Hormuz closed and war-risk insurance soaring, Africa faces a classic external-price and logistics shock. Oil exporters may see fiscal windfalls, but most African countries are net importers of refined fuels and food.

Europe turns to Algeria as war causes Middle East gas supplies to falter - [RFI](#)
28 March 2026

As war in the Middle East disrupts global energy flows and leaves countries scrambling to replace gas supplies from the Gulf, European governments are turning their attention to a North African supplier with pipelines already linked to the continent: Algeria.

**Infrastructure Momentum Redefines East African
Energy Corridor Ahead of AEW 2026**[African Energy Week](#)**26 Mar 2026**

East Africa is emerging as a strategic energy corridor, with several large-scale infrastructure projects underway. Tanzania is pursuing a binding agreement for its long-delayed LNG project while simultaneously launching key storage infrastructure. The East African Crude Oil Pipeline (EACOP) is targeting October 2026 exports, while Kenya's South Lokichar Basin eyes first oil by year-end.
